About Ketrowa

Providing materials and equipment for construction projects is always one of the most important concerns of builders and project managers. The importance of this issue stems from its direct impact on the project schedule, construction cost, and final building value. With the aim of facilitating the process of providing construction goods and taking into account its social responsibility, Ketrowa team has created a comprehensive and online system. In this system, builders will be able to prepare the schedule for the supply of materials and equipment for their construction projects and order the supply of goods based on the plan. These orders are made by comparing various products available in the system. Mass builders are the most important target customers of Ketrowa, and Ketrowa tries to supply and deliver goods on time to the consumer by logical planning for manufacturers and by providing cash and credit purchase model. Also, due to the reception and request for the supply of construction products for foreign markets, the supply of construction products for export markets is another main goal of Ketrowa. Ketrowa plans to transform the traditional and opaque market into a modern, high-speed and accurate market where buyers can get the quality goods they want at the most appropriate price.

MECHANICAL, HEATING
& COOLING FACILITIES

ELECTRICAL
FACILITIES

SANITARY

JOINERY &
FINISHING

STRUCTURE

Products are produced and
supplied in five branches:

Structure, Electrical
Facilities, Mechanical, Heating &
Cooling Facilities, Sanitary, Joinery &
Finishing., combining art and industry.

Fixture Application (Installation Template)

- This practical piece allows us to install the Floor Drain using aquarium glue after the ceramic work and cleaning of the area (in other words, this piece, which acts as a mold for installing the Floor Drain, prevents any damage to the Floor Drain during the ceramic work).
- Another feature of this piece is that if the Floor Drain to be replaced, we can remove the Floor Drain from this piece and replace it simply by creating heat through a heating device such as a hair dryer, etc., without damaging the ceramic and insulation.
- Also, because the fixture fills the gap between the sewer pipe and the drain, there is no need to add a polica pipe.
