

WWW.KETROWA.COM

ABOUT KETROWA

Providing materials and equipment for construction projects is always one of the most important concerns of builders and project managers. The importance of this issue stems from its direct impact on the project schedule, construction cost, and final building value. With the aim of facilitating the process of providing construction goods and taking into account its social responsibility, Ketrowa team has created a comprehensive and online system. In this system, builders will be able to prepare the schedule for the supply of materials and equipment for their construction projects and order the supply of goods based on the plan. These orders are made by comparing various products available in the system. Mass builders are the most important target customers of Ketrowa, and Ketrowa tries to supply and deliver goods on time to the consumer by logical planning for manufacturers and by providing cash and credit purchase model. Also, due to the reception and request for the supply of construction products for foreign markets, the supply of construction products for export markets is another main goal of Ketrowa. Ketrowa plans to transform the traditional and opaque market into a modern, high-speed and accurate market where buyers can get the quality goods they want at the most appropriate price .

MECHANICAL, HEATING
& COOLING FACILITIES

UPVC Pipes & Fittings

Ketrowa Technical Specifications and Features of UPVC Pipes and Fittings

Features and Properties	UPVC
Coefficient of Rroughness (CM)	0.00021
Longitudinal Contraction/Expansion (mm/10m/10°C)	8
Modulus of Elasticity (Mpa)	>3200
Flammability (Oxygen Index)	42% Self-extinguishing
Sun Resistance	OK
Percentage of Dependence on Oil and Gas	43%
Fastening Distance in Pipe (For example, Size 4 Inches)	1.8 m
Flash Point	454 °C

- Very low roughness coefficient
- Completely impervious to moisture, oxygen and dust
- Fully compatible with the environment
- Good insulation against chemicals
- Light weight and quick and easy installation
- Lifespan of more than 50 years
- No flame propagation (self-extinguishing)
- Lowest coefficient of contraction and expansion compared to other polymers
- Very low water absorption
