About Ketrowa

Providing materials and equipment for construction projects is always one of the most important concerns of builders and project managers. The importance of this issue stems from its direct impact on the project schedule, construction cost, and final building value. With the aim of facilitating the process of providing construction goods and taking into account its social responsibility, Ketrowa team has created a comprehensive and online system. In this system, builders will be able to prepare the schedule for the supply of materials and equipment for their construction projects and order the supply of goods based on the plan. These orders are made by comparing various products available in the system. Mass builders are the most important target customers of Ketrowa, and Ketrowa tries to supply and deliver goods on time to the consumer by logical planning for manufacturers and by providing cash and credit purchase model. Also, due to the reception and request for the supply of construction products for foreign markets, the supply of construction products for export markets is another main goal of Ketrowa. Ketrowa plans to transform the traditional and opaque market into a modern, high-speed and accurate market where buyers can get the quality goods they want at the most appropriate price.

Ketrowa Technical Specifications of Mechanical Handle

With polycarbonate washer
Australian brass ring material
Flexibility up to 75 degrees at impact
Resistant to 10 Newton weight pressure
Base alloy made of zamak imported from Australia
Has a steel quadrilateral with slots and grooves
Capable of withstanding 48,000 impacts at a weight of 10 Newtons
200 hours of durability of electrolacquer coating in salt spray test
