ABOUT KETROWA

Providing materials and equipment for construction projects is always one of the most important concerns of builders and project managers. The importance of this issue stems from its direct impact on the project schedule, construction cost, and final building value. With the aim of facilitating the process of providing construction goods and taking into account its social responsibility, Ketrowa team has created a comprehensive and online system. In this system, builders will be able to prepare the schedule for the supply of materials and equipment for their construction projects and order the supply of goods based on the plan. These orders are made by comparing various products available in the system. Mass builders are the most important target customers of Ketrowa, and Ketrowa tries to supply and deliver goods on time to the consumer by logical planning for manufacturers and by providing cash and credit purchase model. Also, due to the reception and request for the supply of construction products for foreign markets, the supply of construction products for export markets is another main goal of Ketrowa. Ketrowa plans to transform the traditional and opaque market into a modern, high-speed and accurate market where buyers can get the quality goods they want at the most appropriate price .

Our Goals and Initiatives

Standardizing and fostering a positive, competitive environment in the elevator cabin and equipment manufacturing industry. Sustainable exports based on world-class quality products. Replacing traditional, workshop-based production methods with industrialized, optimized engineering practices. Transferring and utilizing advanced knowledge, technology, and machinery. Optimizing production and maximizing engineering capabilities across all organizational levels. Enhancing technical standards and engineering in the manufacturing of cabins and related components. Creating a dynamic environment to cultivate talent, foster continuous learning, and uphold ethical values throughout the organization.

PART OF ACTIONS & GOALS

- Organizing and creating a positive and developing competitive environment in the elevator cabin and related equipment industry
- Sustainable export based on global quality products
- Replacing the culture of factory, optimal and engineering production with workshop and traditional productions
- Transferring and applying knowledge, technology and advanced machines of the world
- Optimum production and maximum use of engineering power at all levels of the organization
- Improving the technical and engineering level in the production of cabins and related parts
- Creating a dynamic environment for the flourishing of talents, continuous learning and adherence to moral values and its promotion at all levels of the organization

Elevator Cabin Design and Interior Decoration

Our interior design and execution team categorizes building architectural styles into three main groups: Modern, Classic, and Post-Modern. We strive to harmonize the elevator cabin's interior space with the building's overall architecture and functionality as seamlessly as possible.

By combining aesthetic taste with cutting-edge expertise and specialized design software, our team ensures precision in execution. This approach allows our clients to make more refined and visually appealing choices for their elevator interiors long before the actual production begins.

INNOVATOR IN THE DESIGN & PRODUCTION OF ELEVATOR CABINS

Interior design and decoration of the elevator cabin

Ketrowa cabin interior design and implementation team, by dividing the buildings into three main groups in terms of architecture: modern, classic and post-modern, is trying to implement the interior space of the elevator cabin as much as possible, in harmony with the architecture and use of the building.

Design taste and taste along with up-to-date knowledge and the use of specialized design and architecture software in the design team, as well as precision in the implementation of the interior decoration of the elevator cabin of this collection, has provided the possibility of a more accurate and beautiful choice for customers before production.

ELEVATOR CABINS

Technical & Engineering

The technical and engineering team of Ketrowa cabin with a knowledge-oriented approach consisting of a group of mechanical and elevator engineers in cooperation with reputable research and academic centers, is trying to provide the knowledge and technology used in this industry according to the latest editions of international standards.

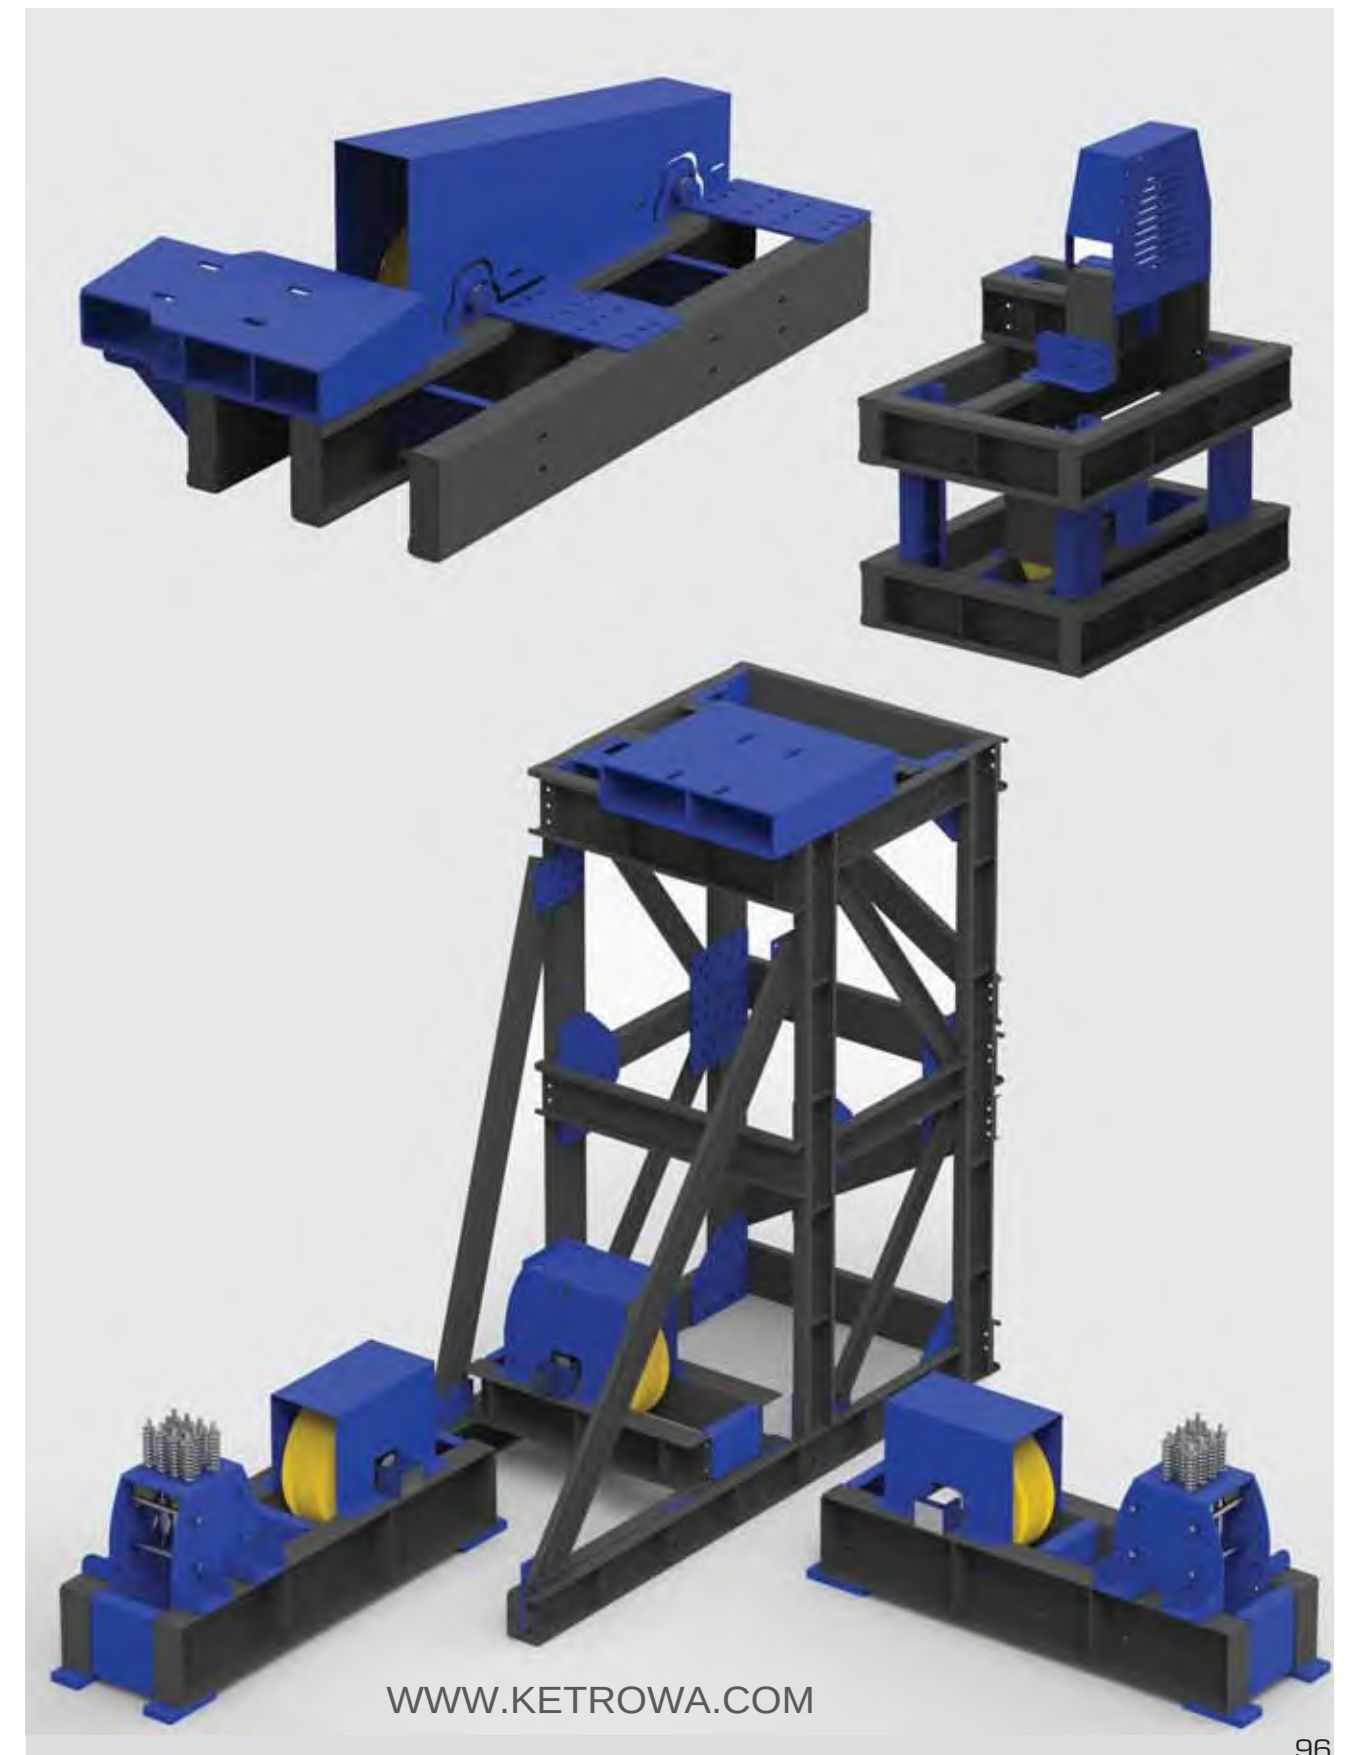

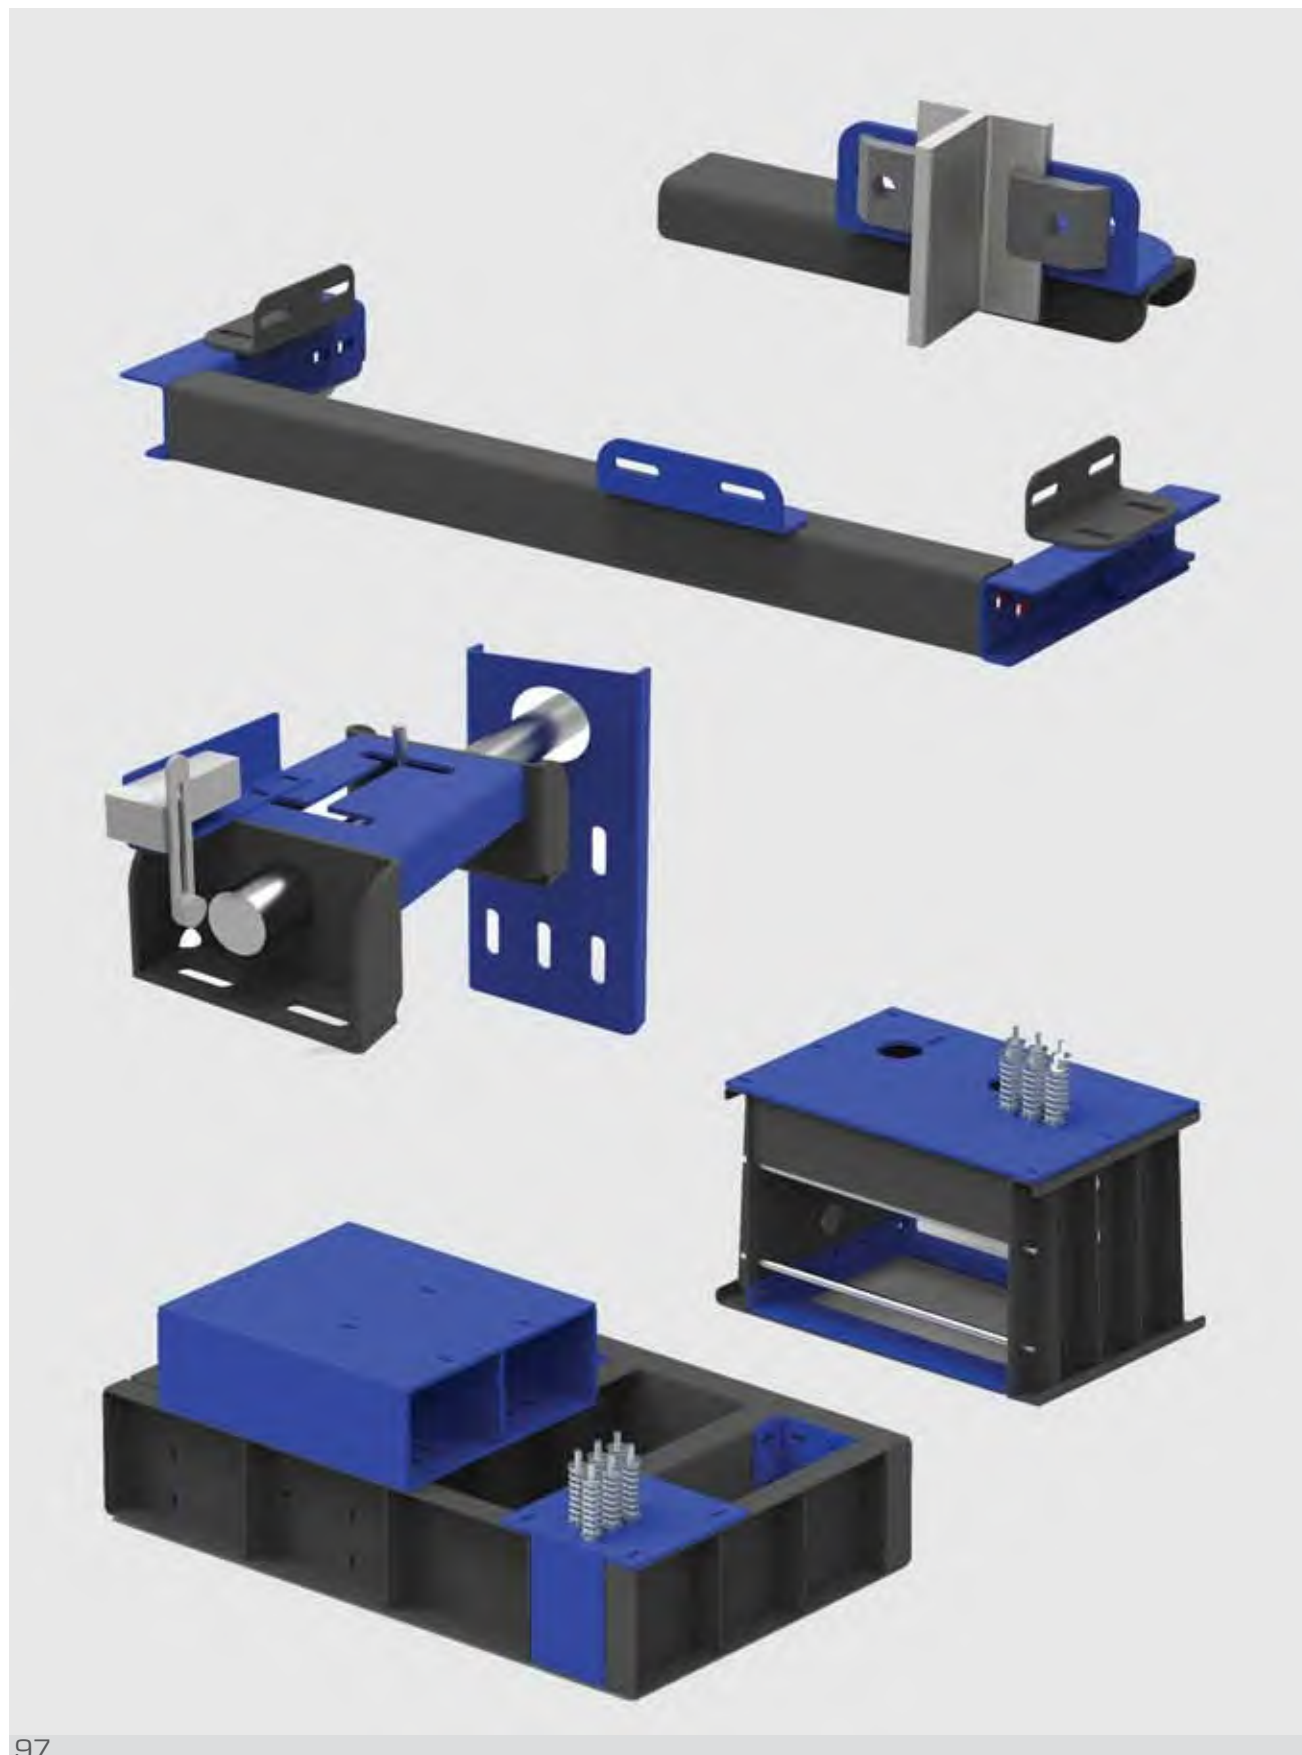

- Expert advice and preparation of 2D and 3D design plans and providing birth certificate and assembly plan of products suitable for each project
- Professional and coordinated cooperation with elevator design and assembly companies in order to increase accuracy in assembling parts and quality in elevator commissioning.
- 3D design and modeling according to the available facilities and parts such as well dimensions, engine type, speed and other influential elements and presenting it before product production
- Accuracy, review and analysis in the selection of primary material as well as conducting related tests
- Sustainable research and development based on modern knowledge to improve the quality of products and services
